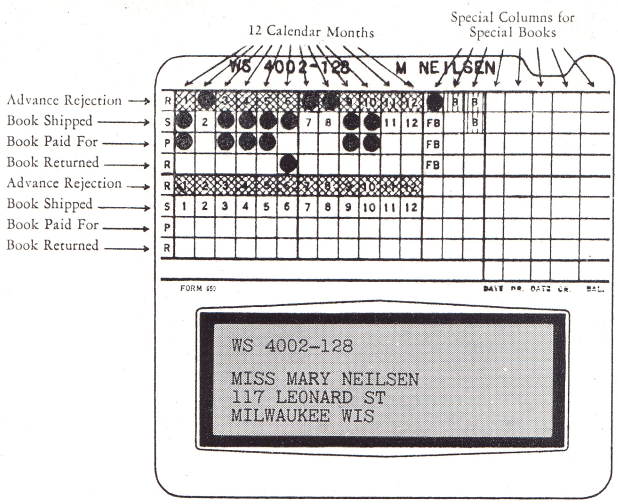
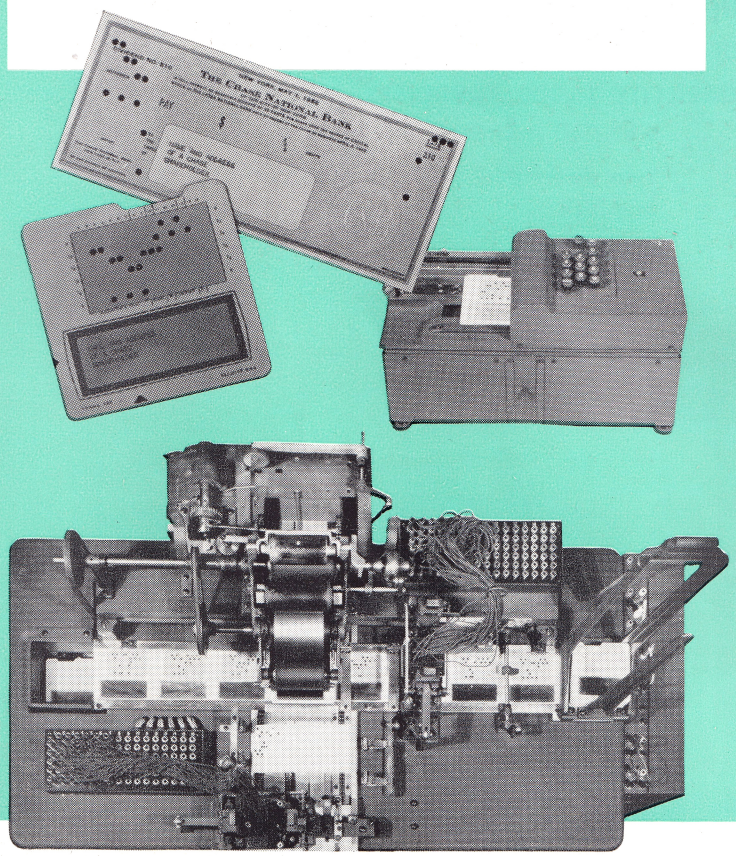
Elliott Addressing Machine Company *Main Office:* Cambridge 39, Mass., U. S. A. • Offices in All Principal Cities

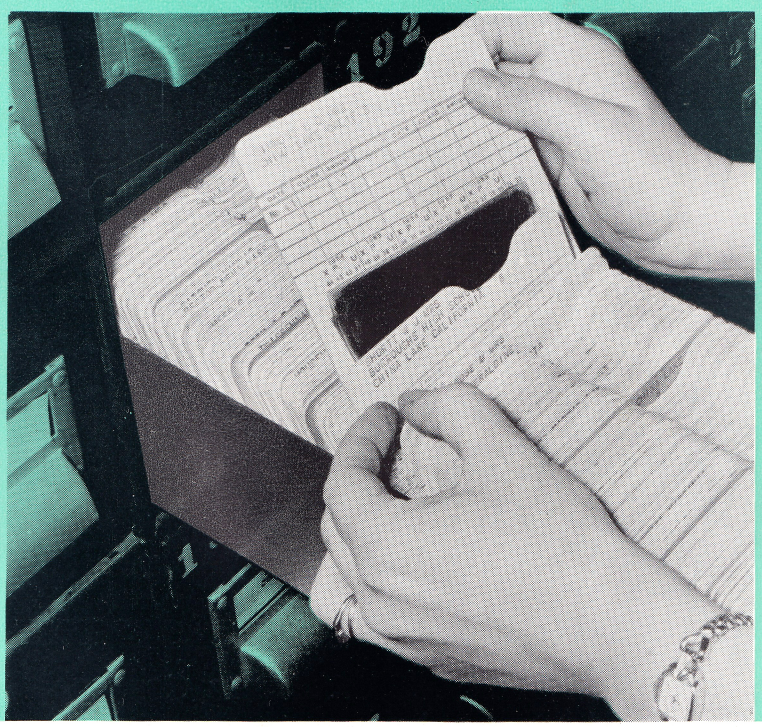


This 4 x 4–3/32 Elliott address card handles both the accounting and addressing of Doubleday's millions of "Book-of-the-Month" Club members. Holes are punched in the frames to indicate books shipped, returned or paid for, thus eliminating a costly bookkeeping department.

This Elliott Address Card typewriter attachment is supplied in your choice of an Underwood manual typewriter or a Royal electric typewriter.



Note the electric keyboard hole punching machine that punches holes in the frame of Elliott 4 x 4–3/32 Address Cards which holes cause this Elliott Addressing Machine to accurately address Remington Rand Punch Card Checks at The Chase National Bank.



Note how Elliott Address Stencils can be combined with any index or ledger records. The machine below automatically feeds whatever forms you want to address and automatically prints the addresses you set it to select as it automatically passes the addresses you want it to skip.
